

● SYSTEM ONLINE · DARBHANGA, BIHAR · INDIA

SHRESTHA

FRONTEND DESIGNER · AI BUILDER · GAME CREATOR

> skill: HTML · CSS · JS · React · Python

01 PROFILE

```
> name = "Shrestha"
> age = 14 # Class 9 student
> base = "Darbhanga, Bihar, India"
> mission = "Build things that make people say 'wah!'"
> stack = ["HTML", "CSS", "JavaScript", "Python", "Flask"]
> status = "Learning full-stack. Building every single day."
```

A self-taught 14-year-old developer from Bihar who turned curiosity into 46+ working projects. Started with HTML, levelled up to Python, and now builds games, tools and AI-powered experiments. Believes in one rule: **copy** → **change** → **run** → **learn**.

02 SKILL MATRIX

◆ HTML5

Structure, semantics, forms

◆ CSS3 · Neon UI

Flexbox, animation, responsive design

◆ JavaScript

Canvas games, DOM, interactivity

◆ React

Component-based interfaces

◆ UI / UX Design

Dark-first, HUD, cyberpunk systems

◆ Python

Core to functions, loops, lists

◆ Flask

Routes, JSON APIs, backend basics

◆ Prompt Engineering

Reliable AI image, video & text output

◆ LLM API Integration

Wiring AI into real interfaces

◆ Security Basics

Input validation, safe parsing

03 TECH ARSENAL

HTML5

CSS3

JavaScript

Python

Flask

JSON APIs

Git Basics

VS Code

CodeChef Compiler

Canvas API

Responsive Design

Game Loops

AI Image / Video Tools

Prompt Engineering

UI / UX Thinking

Product Ideation

04 PROJECTS [SELECTED]

MyDaksha Browser

FLAGSHIP

An AI-supported browser that doesn't just display pages – it understands them. One-click page summaries, self-organising tabs, voice commands and a focus mode. Currently in dev (v0.4).

Design + Build · 2025-26

Indian Train Simulator v5

3D SIM

Vertical-format realistic train driving simulator with authentic WAP-7 engine feel, ICF coaches and track sound design. Built from scratch in HTML/CSS/JS.

HTML · CSS · JS

GAME

Temple Run: Train Edition v2

Endless-runner mashup with Indian temple themes, score system and progressive difficulty. Portrait-first mobile design.

JS Canvas · Game Loop

ARCADE

Neon Arcade Series

A collection of 8 neon-styled browser games: Tetris, Pong, Maze, 2048, Invaders, Racing and more – all hand-coded, zero libraries.

HTML · CSS · JS

AI

Daksha Voice Agent UI

Interface concept for a voice AI assistant with feature showcase, animated states and browser-based demo.

HTML · CSS · JS

PYTHON

Calculator App + Safety Layer

Flask-powered calculator with a secure expression parser (regex whitelist) that blocks code-injection attacks. Learned why you never trust raw user input.

Python · Flask · Security

3D

Helicopter Simulator 3D

Flight-physics sandbox with pitch, yaw, throttle controls and camera modes. Reached v8 through 8 rounds of iteration.

JS · 3D Math

EDU

Python Course (Interactive)

Built a full 12-chapter interactive Python course with live quizzes, progress tracking and a final boss quiz – for learners like himself.

HTML · CSS · JS

CREATIVE

AI Visual Lab

25+ AI-generated artworks and 15+ videos – from cyberpunk cities and ISRO mission art to animated concept films. Full creative pipeline: prompt, generate, edit, deliver.

AI Tools · Design

SELF-TAUGHT

06 JOURNEY LOG

2026 · SEPT

Cleared Python fundamentals

Completed a self-built course – from `print()` to functions, loops and lists. Scored 9/10 in the final exam. Started building Flask apps.

2026 · MID

HTML / CSS / JavaScript mastery track

Went deep into selectors, box model and flexbox. Shipped dozens of browser games and UI experiments.

2026 · EARLY

First games & first AI artworks

Built the first playable browser games and discovered AI image/video tools – the start of the creative lab.

BEGINNING

The spark

Opened a code editor for the first time and never looked back. Copy → change → run → learn, every single day.
